

IT & Development Infrastructure Manager (m/f/d)

For our international deep-tech Start-Up spread around various locations within Europe we are looking for an IT & Development Infrastructure Manager to set up and control our IT Infrastructure and work environment. We are looking for a hands-on person with in-depth experience in a broad field of IT and Development Infrastructure. Your mission in this role is to guarantee a well-functioning and futureproof IT & development infrastructure that enables us to achieve our company goals.

Your role

Your function will mainly include the following:

- Setting up ASIC development IT infrastructure & work environments
- Installation of EDA tools, FAB PDKs and 3rd party IP
- Administration of license servers
- Setting up remote work environments ((including cloud) and secure perimeters
- Definition and customization of EDA tools, design flows, methodologies, synchronizing tools and automation in close cooperation with the design teams
- Work on IT infrastructure to analyse and optimize the use and performance of EDA tools across multiple design sites
- Work with vendors and suppliers to obtain knowledge on tool options; selection of best tools needed for a project
- Provide local support
- Linux systems administration
- Setting up built-systems, simulation environments, regression and continuous integration flows
- Administration and maintenance of job scheduling systems
- Administration of revision control systems
- Administration of bug tracking tools and integration with project management and revision control tools
- Setting up document management control system

Your profile

- B.Sc/M.Sc. in Information technology or computer science
- > 3 years of working experience in a comparable role
- Passion for innovation & a sophisticated understanding of technological systems and programming
- In-depth know-how in Linux, servers support and maintenance, firewalls and security
- Experience with one or more of the following technologies: VPN, VNC, setting up VMs, backup systems, revision control tools, CAD tools installation, EDA license servers
- Familiar with cloud servers (AWS)

- Strong scripting skills
- The ability to coordinate cross-country projects and work together with remote team members
- Excellent communications skills to work in an effective manner with end-users as well as Third Parties
- Hands- on and can-do mentality
- Fluency in English is a must (written & spoken), German and/or Dutch is a plus

Who we are

Axelera AI is a truly European deep-tech Start Up company which is developing a game-changing hardware and software platform for AI at the edge that will make the industry more integrated, efficient and accessible. Our mission is to spread artificial intelligence for a green, fair, trusted and safe world enabling new application of AI in diverse sectors like smart cities, retail and other markets. Our company is a spin-off from a multinational deep-tech group and is backed by a strong syndicate of institutional investors. We have an extraordinary and international team of top talented researchers and developers working in the headquarter in Eindhoven (NL) and in the branch offices in Leuven (BE), Zurich (CH) and Pisa (IT).

What we offer

Take the chance to become part of a dynamic, fast-growing, international organization. We offer an attractive compensation package, including a pension plan, extensive employee insurances and the option to get company shares.

An open culture that not only supports creativity and continual innovation is awaiting you. Collaborative ownership and freedom with responsibility is characteristic for the way we act and work as a team.

Interested?

Great! We are looking forward to receiving your application! For any further questions or information, please feel free to contact Heike Wilfling, HR Business Partner, careers@axelera.ai. For further information on Axelera AI please also have a look on our website: www.axelera.ai
